

PROJECT SHOWCASE

Date complete	2008
Project	BRAEBURN & BRAESIDE SCHOOLS – PRIMARY & HIGH SCHOOL UNITS respectively
GPS / location	Garden Estate & Lavington, Nairobi respectively
Architect	Planning Systems Services Ltd
Roofing Contractor	Superfit Steelcon Ltd
Roofing Material	COLORPLUS AZ100 - 0.60mm
Profile	Saflok700 – profiled on site to 42M longest length
Special features	The product was done in a special shade of White (Fish Eagle White) for optimized heat reflectivity. All flashing accessories also supplied by MRM from fabricators shop drawings. Project is a Gold winner in the 2016 AAK DURACOAT design awards.
Other notes	The institutions are one of Kenya’s premier learning institutions in the high-end market segment & they lie in exclusive serene locations of Nairobi

ADDITIONAL NOTES:

The demands of a functional roof of the Architects design could only be captured by use of single-length, site profiled Saflok700. These encompassed:-

- Flexibility – a covering flexible enough to arc along the parabolic roof ‘umbrella’ form
- Engineering – a light, strong material to minimize weight of excessive overhangs on light carrying structure
- Weather-tightness at low, changing pitch (the slope alternates between 4° to 12° across the roof form)
- Special White colour for enhanced solar reflectivity
