<b>Developer</b>	St. Andrews School Board of Governors
<b>Profile</b>	SAFLOK700
<b>Special features</b>	St. Andrews School, Turi is one of Kenya's elite private schools; a co-ed facility that runs a British curriculum and sitting on 450 acres of rain-swept grounds on the highlands of the Great Rift Valley. Its clientele consists the regions crème' de la crème in government, corporate & diplomatic circles. The school sought a refresh for its 70-year old facilities (& some new ones) in 2015, the project team found in MRM's Saflok700 the perfect brand to exemplify their school motto; "seeking the highest"! In this, the new flagship structure was a sports hall for indoor disciplines whose arching Saflok roof cover was laid in single, site-processed lengths on a mega-vault that is at once both functional and aspirational. Most re-roofed structures were allowed individual colour identity through varying shades of Royal Blue, Green & Maroon to mirror the kaleidoscope of cultures & races that are the Turi School community. All bound together by the school's strong heritage that, 86 years on, continues to thrive under the ultimate weather-protection of the strong bold lines that uniquely identify MRM's Saflok700 profile. On to the next 86 years!

The flagship brilliant white Saflok-clad Sports Hall, a place to excel all season long under the weathertight, concealed-fix cover

### ADDITIONAL NOTES:

Success in the 2 year phased planning, supply & installation of Saflok700 cover on myriad structures was a culmination of constant feedback between 2 contractors, a demanding client and their top-tier consultants. Strict timelines & varying order sizes called for great internal coordination, stock and logistics management to ensure the conveyor belt of service never stalled, another great tribute to the team-work that defines MRM!
