<b>Architect</b>	Boogertman + Partners Architects
<b>Roofing Contractor</b>	Bells Associates Ltd
<b>Developer</b>	CENTUM INVESTMENTS GROUP & AVIC
<b>Used Material</b>	COLOURPLUS AZ100 - 0.60mm
<b>Profile</b>	SAFLOK700
<b>Special features</b>	East & Central Africa's largest mall, Two Rivers, testifies to Nairobi's vibrant growth of a consuming middle-class with an unequalled appetite for new retail space development. The 65,000 sqM development has attracted the world's biggest brands & promises the finest in retail, dining and entertainment experience after it opens its doors in Feb 2017. While most of the podium-level is dedicated to parking and solar power generation, the South African architects insisted on nothing less than premium concealed-fix Saflok700 for areas under roof cover which is interspersed with glass sky-lighting to maximize on natural lighting throughout the mall's interior main thoroughfare.

### ADDITIONAL NOTES:

The main challenge was in adapting Saflok's strong, angular properties to a jelly-like curvilinear form of the internal street. MRM worked very closely with the specialist installer, customize almost each sheet and flashings to fit. The tight-timelines indicated meant work around the clock and with very close supervision for the installers without prior experience in installing concealed fix profiles.

Eventually, Saflok700 takes its pride of place atop the main circulation areas of this new mall, another crowning moment in MRM's delivery for project in Kenya & beyond.
